I am writing on behalf of my fellow working brothers and sisters that have found out they have asbestos. I feel that this is a slap in the face to the working people and the Michigan constitution as well as the united states constitution makes it clear that judges are not to make the law but to interpret them so why is this going on his will deny the asbestos disease victims the right to a jury trial of which in the last four years only one case went to trial all the rest were settled before trial. The real crisis in the stat of Michigan is the fact that big business and the asbestos industry feel free to take the working peoples lawsuits out of the courts and away from the juries? If the supreme court places current asbestosis cases on the shelf, other cases around the country will go a head with theirs and hinder the Michigan cases thus useing up the funds to pay and leaving the Michigan one out in the cold this is what the big business want so IM against it and that is my mind IM an asbestos claim recipient and there are others out there to tha say no to this thank you for hearing my voice on this matter HAROLD E. McCORMICK .
